PROJECTS DETAILS

06/2026 – 06/2026

[Multi-Domain Inventory Control System](#)

Tech Stack: HTML, Bootstrap, JavaScript

Description: This is a simple, lightweight inventory dashboard used to track equipment across **5 business branches** (such as IT, Mechanical, and Medical). It provides an instant, searchable table to add supplies, update quantities, and see a live history log showing the exact **"Old Value to New Value"** changes. The system automatically highlights an item in bright red whenever its count drops to **5 items or fewer**, so you never run out of stock.

Roles & Responsibilities:

- Built a responsive, split-screen layout using **Bootstrap 5** with color-coded badges to separate Engineering and Medical parts cleanly.
- Used a **Local Storage** database system to save inventory without a server.

03/2026 – 03/2026

[Weather Dashboard - weather-dashboard26.vercel.app](#)

Technology: HTML, CSS, React.js

Description:

- Built a **Weather Dashboard** using **4 technologies:** HTML, CSS, JavaScript, and React.js
- Displays **instant temperature and weather details** based on city/place input & also ensures a **fully responsive and interactive UI** across devices

02/2026 – 02/2026

[RS Masale Website --myrsmasale1966.netlify.app](#)

Technology: HTML | CSS | JavaScript

Description:

- **HTML5 + CSS3 + JavaScript** — Built with modern responsive web technologies.
- **Smooth Scroll & Glass Morphism UI** — Advanced animations with interactive effects.
- **Optimized Performance** — Optimized responsiveness across **3 device screens: mobile, tablet, desktop**
